

Audacity®

## TIPS AND TRICKS!

### MASH-UP PROJECT

When you are done with your project it is best to compress it into ONE TRACK before EXPORTING it as an MP3. To do this follow the steps below:

1. Save your project as an audacity project.
2. Highlight all your tracks
3. On the menu select TRACKS
4. Select Mix and Render
5. Now EXPORT it to an MP3

### POD CASTING PROJECTS

After recording your voice tracks by making a few adjustments you can make the sound quality better. Follow the steps below.

#### INCREASE RECORDING QUALITY

1. Select the Voice Track
2. In the EFFECTS menu choose - COMPRESSOR
3. Now go back to the EFFECTS menu and select NORMALIZE

#### REMOVE BACKGROUND NOISE

1. Select a small portion of the track with no recorded voices
2. On the EFFECTS menu select NOISE REDUCTION
3. Click on the button that says **Get Noise Profile**
4. Select the entire track
5. Go back to the EFFECT menu and select NOISE REDUCTION
