Writing an MLA Style report is not a difficult thing. Remember that when you get information directly from a source you need to give that source credit. To do this you will type the authors name in parenthesis after the statement. It can be in quotes if it is a word for word statement. Other wise you can paraphrase, which is to put it in your own words. Remember you can not repeat more than three significant words in a row or it is considered plagiarism.

“Plagiarism is using another person's ideas or creative work without giving credit to that person. (Columbia Gorge Community College). Be careful of this! Even though I am not an English teacher I will be looking for a “voice” that sound like you.
