# MOVIE POSTER
GIMP FINAL PROJECT

Create your very own movie poster using all the tools and tricks of GIMP. You can be as creative and as crazy as you l like as long as the final product is **School Appropriate**! Come up with your own movie concept or use a classic. The following elements and guidelines must be followed.

GUIDELINES:

- Canvas size should be 3300 x 5100 pixels
- All images used should be over 1000 pixels in any direction.
- Text must be used for the MOVIE TITLE! Either outline your text or use a visible drop shadow.
- Movie Poster will have a border with a minimum with of 50 pixels
- Three elements must be cut out (lasso tool) and placed on the canvas.
- Scaling, rotating and cloning tools should be used to create a professional image
- Final product should be clear (not fuzzy) and well composed
- A written summary of the tools and techniques used should be submitted in Edmodo in a word document with an MLA style header.
- All photos must be sourced with the exact URLs – Start a documents and keep track of them as you design your poster.

Have Fun and Be Creative!!!
